Hiring Manager

Dear Sir/Madam,

I am excited to apply for the ICT Manager Job position. I pose good experience supporting highly scalable applications and web services, and a strong background as a software developer specializing in the Full stack MEAN Stack (AngularJS, JavaScript, TypeScript, HTML, CSS, NodeJS, ExpressJS, MSSQL Database, Redux, FIGMA, Adobe and Docker), I am confident in my ability to contribute effectively to your team.

In my career, I have gained extensive hands-on experience with cloud technologies, particularly AWS and Docker. I hold a Bachelor of Science in Information Technology, which has provided me with a strong foundation in cloud infrastructure management. I have effectively handled the orchestration and management of containerized applications, ensuring high availability, scalability, and seamless deployment processes. Additionally, my expertise extends to networking technologies such as DNS and load balancing, which has enabled me to resolve complex infrastructure challenges and optimize system performance across various environments.

In my previous roles with SOS Kenya Organization I was working under the Head of ICT Manager and was able to gain a lot of experience on managing ICT Department resources and functionalities to achieve best organisation objectives and in The Jitu Company, I was responsible for handling both simple and complex technical support issues, including troubleshooting cloud infrastructure problems and resolving application deployment challenges. I take pride in providing “white glove” onboarding support and delivering excellent customer service to ensure seamless operations. Additionally, I have contributed to developing and improving support tools and processes, ensuring operational efficiency at scale.

Moreover, I have recently started expanding my skill set to include .NET development, which further enhances my versatility as a developer. This new knowledge, paired with my proficiency in Angular, equips me with the tools to tackle the diverse challenges in creating cutting-edge e-commerce platforms that cater to your customers across the continent.

I am particularly excited about the opportunity to work with you, where I can leverage my cloud expertise and technical problem-solving abilities to support your clients' infrastructure while continuously improving service delivery. The dynamic and cutting-edge nature of the descriptions aligns perfectly with my technical skill set and passion for supporting scalable solutions.

Thank you for considering my application. I am eager to discuss how my skills and experience can contribute to the success of your team and clients.

Warm Regards,

Christian Abiodun Ademola
